Carbon Reduction Plan

Supplier name:	**JNN JastSafe Home Care LTD, Orion House, Welwyn Garden City**
Publication date	**23 November 2026**

Commitment to achieving net zero

JNN JastSafe Home Care LTD, is committed to achieving net zero emissions by 2050

Baseline emissions footprint

Baseline year: 2026-2027	
Additional details relating to the baseline emissions calculations:	
Additional details relating to the baseline emissions calculations: This is our first Carbon Reduction Plan. No footprint was compiled for earlier years, so we have adopted FY2026/27 as both our baseline and current reporting year. We provide home care across Hatfield, Welwyn Garden City, Hertford and Stevenage. We operate from a single office at Orion House and have no owned vehicle fleet, so our footprint is dominated by Scope 3, mainly the travel our care workers undertake to reach people in their own homes. Emissions are quantified using activity-based and spend-based methods with UK Government (DESNZ) conversion factors. Our Carbon footprint is quite small. Emissions are mainly due to vehicle use. Office staff remain small, at just 3 members.	

Baseline year emissions: 2026/7	
Emissions	Total (tCO2e)
Scope 1	0.0
Scope 2	1.6
Scope 3 (included sources)	47.5
Total emissions	49.1

Current emissions reporting the same figures as the baseline table above

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next five years to 36.8 tCO2e by 2032. This is a reduction of 25%.

Completed carbon reduction initiatives: The following measures are in effect when performing the contract.

- Staff on double-up calls share one vehicle where possible.
- Reduced backroom office staff to remain.
- Management will continue to work from home where possible.
- Where possible, in between calls staff will be in the office rather than going home, unless home is the nearest station from the last call visit.
- Mileage monitoring
- Hybrid or electric vehicles, encouraged. Currently the 2 senior managers have an electric and hybrid vehicles.
- Route and rota planning to cut mileage between calls.
- Hybrid or electric vehicles Walking or cycling for short visits.

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
